SplashLink and Pipeline H2O Announce Exciting New Partnership

Cleveland, OH, September 19th, 2017 – SplashLink, water’s online platform, and Pipeline H2O, a water technology commercialization program administered by The Hamilton Mill small business incubator, are pleased to announce a new partnership that will provide all companies coming through the next Pipeline H2O accelerator program with unique access to an online marketplace built exclusively for the water industry. “Our partnership with SplashLink will equip the businesses within our program with a level of market access they cannot attain elsewhere,” commented Antony Seppi, Operations Director at The Hamilton Mill. “We are thrilled to join forces with SplashLink to enhance the range of support resources and services we offer to entrepreneurial companies focused on emergent water technologies.”

“We are excited to team with Pipeline H2O to support the development of water technologies aimed at addressing major challenges within the water sector,” said Ebie Holst, CEO of SplashLink. “It is encouraging to see organizations like Hamilton Mill putting a focus on the needs of the water industry. We look forward to supplying the Pipeline H2O program with some of the most advanced web tools available to help companies cultivate relationships with influential players in the industry and locate opportunities that would otherwise not cross their path.”

SplashLink serves organizations and individuals that are concerned about missing opportunities within the water industry and looking to increase their market share. As the only water-focused online platform in the industry, SplashLink provides a one-stop resource that enables industry buyers, sellers, and innovators of water solutions to locate one another, as well as millions in financing and thousands of project opportunities from sources across the industry. Additionally, SplashLink is the leading source of real-time market intelligence for the most significant economic growth-market since the oil boom. “Through the natural activity that occurs on the SplashLink platform, we have a constantly updated resource that can help decision-makers of all kinds better position themselves in this ever-changing environment,” added Jason Wuliger, Vice President of SplashLink.

Hamilton Mill’s Pipeline H2O program seeks to identify and accelerate startups and early-stage companies focused on commercializing innovative water technologies designed to tackle a number of the world’s main water challenges, including water reuse, wastewater treatment and monitoring, and infrastructure improvements. Pipeline H2O is currently accepting applications for Pipeline Class 2018, a 15-week program that begins in February 2018 and extends through May 2018. The program, which combines the most prominent organizations in the water technology market with experts in venture development, is supported by a group of regional cities, universities, utilities, and startup organizations throughout the Greater Cincinnati region.

About SplashLink

SplashLink (www.splashlink.com) is the first online marketplace to support an entire range of project, financing, and sourcing needs for the highly fragmented and increasingly stressed global water industry. Whether dealing with industrial process water, municipal infrastructure or drought adaptation, SplashLink enables water-solution buyers and sellers quick and easy “one-stop shop” access to funding, collaboration, and bidding opportunities. SplashLink accelerates response to local and global water challenges by connecting industry players and opportunities with this innovative platform like never before.

About Pipeline H2O

Pipeline H2O (pipelineh2o.org) is a water technology program engaged in identifying and commercializing the world’s leading water-based startup technologies. The program leverages the country’s premier public-private water innovation cluster to provide customers, mentors, and support, and its unique go-to-market platform allows startups to pilot locally and deploy globally. Pipeline H2O is managed by The Hamilton Mill, a non-profit small business incubator located in Southwestern Ohio, in partnership with Cintrifuse, Village Capital, Confluence, and other vested stakeholders.
